PLANNING COMMISSION STAFF SUMMARY REPORT – TEMPORARY LAND USE PERMIT

Work Session: October 1st, 2026, **Public Hearing:** October 8th 2026

Case Number: TLUP-2026-03

Current Zoning: R-20 Single Family Residential

Proposed Request: The applicant is requesting a temporary land use permit to operate a dog training facility.

Staff Recommendation:

APPLICANT & PROPERTY INFORMATION

Name: Jonathan Irons

Property Address: 5480 Burdett RD SE

City/State: Mableton, Georgia 30126

Acreage: Appx. 10.00

District: 4, Council member Cassandra Brown

Parcel Identification: 17039500330 and 17039500290

Future Land Use: Low Density Residential (LDR).

PURPOSE OF REQUEST

The applicant, Jonathan Irons (on behalf of Dogs We Trust, LLC and owner The Maya Moore Declaration of Trust), is requesting a Temporary Land Use Permit (TLUP-2026-003) for a duration of 24 months. The intent is to operate a low-impact home occupation consisting of canine training, behavior modification, enrichment, and service-dog development program ("stay-and-train") with limited supporting boarding

SITE ANALYSIS

I. Background Information on the Property

The subject property consists of approximately 10 acres across two parcels located at 5480 and 5486 Burdett Road SE, Mableton, Georgia 30126, identified as Parcel Nos. 17039500330 and 17039500290. The properties are currently zoned R-20 (Single-Family Residential) under the applicable Cobb County zoning classification and are owned by The Maya Moore Declaration of Trust / Jonathan Irons and Maya Moore Irons.

On December 17, 2024, during the zoning public hearing meeting, the Cobb County Board of Commissioners considered **LUP-41**, submitted by Maya Moore, Trustee of The Maya Moore Declaration of Trust, for a Temporary Land Use Permit allowing a home occupation for dog training at 5480 Burdette Road. Following public comments and discussion, the Board approved the permit unanimously by a **5-0 vote for six months**, with no subsequent renewal requests permitted. Approval included several conditions, including limiting the property to no more than eight dogs at any time, consisting of up to five customer dogs and three personal dogs. The applicant was also required to install perimeter fencing, including improvements to the front gate, within **30 days** of approval to prevent dogs from escaping. All other applicable staff comments and recommendations remained conditions of approval.

The applicant proposes a use supported by substantial professional experience in animal training and handling. The applicant has accumulated more than 15,000 documented hours as a U.S. Department of Labor-certified Animal Trainer, with training and practical experience obtained through the Puppies for Parole program. This extensive professional background demonstrates the applicant's qualifications and experience relevant to the proposed animal-related use of the property.

II. Applicants Proposed Project Analysis

The proposed operation will provide structured obedience training, behavioral modification, and service-dog preparation, with boarding limited exclusively to dogs participating in active "stay-and-train" programs rather than general commercial boarding. The facility will accommodate a maximum of 7 to 15 client dogs at any given time and will operate from 8:00 AM to 8:00 PM, Monday through Saturday, with no routine outdoor business activities on Sundays or legal holidays. Operations will be managed by two onsite resident employees/trainers. To minimize neighborhood impacts, no client drop-offs or pick-ups will occur at the residence. Staff will transport dogs using a company-owned Ford Transit van on scheduled routes, thereby limiting additional traffic.

Dogs will be primarily housed in climate-controlled indoor areas, with supervised outdoor activities occurring within a designated 3–4-acre area enclosed by an eight-foot privacy fence and sound-dampening screening. The property will also maintain 24-hour video and audio surveillance. Professional-grade daily sanitation procedures, including routine disinfection and secure waste storage, will be implemented to minimize odor, waste, and runoff and maintain sanitary site conditions.

III. Surrounding Land Use and Zoning Pattern

The subject property is surrounded on the north, south, east, and west by a combination of single-family residential properties and undeveloped wooded parcels, generally within the R-20 Single-Family Residential zoning district. The surrounding development pattern is characterized by low-density residential uses, mature vegetation, and substantial areas of natural tree cover.

The approximately 10-acre site provides significant separation between the proposed animal training activities and neighboring residential properties. More than 100 feet of natural wooded setbacks and existing vegetation are maintained around the property boundaries, creating a substantial visual and physical buffer. These wooded areas help screen the active training area from adjacent residences while providing additional separation that may reduce potential noise, visibility, and operational impacts. The combination of the property's acreage, existing mature vegetation, and substantial setbacks provides an effective transition between the proposed use and surrounding single-family residential development.

IV. Applicants Proposed Development

- **Site Improvements:** No main structural additions or heavy commercial site alterations are proposed.
- **Existing Facilities:** Uses existing primary residence and finished accessory spaces for indoor training and boarding.
- **Fencing Infrastructure:** Active outdoor exercise and training space is enclosed by an existing 8-foot privacy fence outfitted with interior visual/sound fabric screening.
- **Signage:** No commercial exterior signage will be posted on or near the residential property.

Standards for SLUP Criteria

Section 5.03 STANDARDS FOR SLUP

The Mayor and City Council may grant special land use permits for any period of time in their discretion. In addition to purpose and intent of the zoning district where the property lies, the Mayor and City Council shall consider, at a minimum, the following in its determination of whether or not to grant a special land use permit:

A. Will there will be a significant adverse effect on the neighborhood or area in which the proposed use will be located?

Applicant does not anticipate a significant adverse effect on the neighborhood or area surrounding the real property located at 7377 Cityview Drive, Austell, Georgia 30168 (the "Property"), in which the proposed use will be located. To the contrary, Applicant believes that the proposed use will benefit the neighborhood and surrounding area. nd tourist uses, including, without limitation, GC, TS and NS, each of which permits the use of the Tower with a special land use permit. Of the approximately 5 parcels adjoining the Property, only one is currently developed and occupied, which is the restaurant located on the parcel immediately west of the Property and owned by the same owner as the Property. Therefore the Tower will not have an adverse effect on the uses of the surrounding parcels. In addition, the Tower will not have a significant adverse effect on the aesthetics of the neighborhood or surrounding area. The galvanized steel monopole tower is designed to be unobtrusive and will blend in with the power poles, streetlights, tall trees and commercial signage already in the area. Applicant further notes that there are four (4) towers within a 1 mile radius of the proposed Site which do not appear to have a significant adverse effect on the neighborhood.

More importantly, the proposed Tower is anticipated to benefit the surrounding area by filling an existing gap in coverage experienced by T Mobile customers traversing along, or living or working near, the Interstate 20 and Riverside Parkway corridors near the Site. The residents and businesses subscribed with T-Mobile should experience The proposed Tower will be located on a hotel parcel zoned TS and will be surrounded on all sides by either public right of way or vacant and/or operating properties with zoning designations compatible with commercial a stronger, more reliable coverage as a result of the new Tower and, as other carriers collocate on the Tower, subscribers of other wireless providers should benefit as well. In addition, gaps in wireless coverage negatively impact neighborhoods by posing health and safety risks. A gap in coverage affects (i) a person's ability to contact E911 services in the event of emergencies, whether the emergencies relate to house or business fires, health emergencies or car accidents along Interstate 20 and Riverside Parkway, and (ii) a person's ability to receive critical notices from the City and Cobb County, including severe weather alerts, missing persons alert, and water and sewer disruptions. Resolving the existing gap in coverage via the construction of the proposed Tower will reinforce the City's and County's E911 and emergency alert services, providing a great benefit to the public welfare.

B. Is the use is compatible with the neighborhood?

As noted in paragraph A above, the use as a proposed tower is compatible with the neighborhood. The Property and all parcels surrounding the Property are zoned for commercial or tourist issues, and the proposed Tower is a permitted use with a special use land permit on each of the parcels immediately surrounding the Property. In addition, the Property is designated as a community activity center on the Future Land Use map, which is a category designed to meet the needs of neighborhoods by encouraging low to medium intensity office, retail and commercial services, particularly around freeway interchanges and arterial roads. The coverage provided by the proposed Tower will provide an essential function to support those office, retail and commercial uses. There are also four (4) towers within a 1-mile radius of the Site which have previously been determined to be compatible with the neighborhood, and Applicant knows of no fact which would suggest that the addition of the Tower on the Site would be incompatible with the neighborhood.

C. Will the use proposed will result in a nuisance as defined under state law?

Georgia law defines a nuisance as "anything that causes hurt, inconvenience, or damage to another and the fact that the act done may otherwise be lawful shall not keep it from being a nuisance. The inconvenience complained of shall not be fanciful, or such as would affect only one of fastidious taste, but it shall be such as would affect an ordinary, reasonable man." (See O.C.G.A. Section 41 1 1). A telecommunications tower does not cause hurt, inconvenience or damage to others nor would it adversely affect an ordinary, reasonable person. In fact, the service that the Tower provides benefits individuals. Cellphones have become commonplace and provide a significant value to the average person in an increasingly mobile and remote environment by providing individuals with the ability to communicate effectively with anyone at all times.

D. Will the quiet enjoyment of surrounding property will be adversely affected?

The operation and maintenance of the Tower will not adversely affect the quiet enjoyment of surrounding property. Once constructed, there will be low and infrequent activity to and from the Tower, which such activity will be limited to installing carrier equipment at the Site and maintaining the Tower and Site. Such activity will ordinarily be confined to business hours unless in an event of an emergency.

E. Will the property values of surrounding property will be adversely affected?

The use of a small portion of the Property as a Tower should not have an adverse effect on surrounding property values given that the Property is surrounded by public right-of-way and commercial uses.

F. Are adequate provisions made for parking and traffic considerations?

Adequate provisions have been made for parking and traffic considerations. The operation and maintenance of the Tower will have little to no effect on existing traffic counts after construction, and construction activity itself is also limited. In addition to leasing a portion of the Property, Applicant has obtained access, utility and parking easements on the parent tract to permit Applicant to access the Site using existing roads and drive aisles and to park on the Property during any construction, maintenance or operational activities.

G. Is the site or intensity of the use appropriate?

The use of the Site as a Tower is not an intense use, and, as discussed above, the uses surrounding the Site are compatible with the use of the Site as a Tower. Therefore, the location and low intensity of the use is an appropriate use of the Site.

H. Do special or unique conditions overcome the Mayor and City Council's general presumption that residential neighborhoods should not allow noncompatible business uses?

Applicant notes that the Site and the parcels immediately adjacent to the Site are not zoned residential, but instead are zoned for compatible commercial uses.

I. Are adequate provisions made regarding hours of operation?

Applicant has obtained an easement from the owner of the Property to access the Site twenty-four hours, seven days a week to operate the Tower and perform regularly scheduled and emergency maintenance. Except during events of emergency, the majority of operations and maintenance activities will occur during normal business hours. Applicant has also assigned a member of its staff to act as a 24 7 contact for the Site and the Tower.

J. Are adequate controls and limits placed on commercial and business deliveries?

There will not be regular commercial and business deliveries to the Site. Wireless carriers, such as T Mobile, will bring any equipment with them that is needed to install or maintain their equipment located on the Tower. Applicant has obtained adequate parking from the owner of the Property to ensure that both Applicant and wireless carriers can deliver equipment to the Site as needed.

K. Are adequate landscape plans incorporated to ensure appropriate transition?

Applicant has designed a plan that incorporates a retaining wall and a brick column wooded fence to level the Site, ensure proper runoff and drainage, secure the Site and ensure an aesthetic appearance to the Site. As of today, the Site is currently on a gradual, downward slope which has resulted in the accumulation of trash and debris in the natural vegetation between Riverside Parkway and the Site. Additional vegetation could be added, but Applicant believes leveling the Site with a retaining wall and providing an aesthetic fence is a better means to shield and secure the Site and to keep the area free of trash and debris.

L. Will the public health, safety, welfare or moral concerns of the surrounding neighborhood be adversely affected?

The use of the Site as a Tower will not adversely affect the health, safety, welfare or moral concerns of the surrounding neighborhood. Security fencing will be implemented to deter and prevent the public from accessing the Site, such that only authorized personnel will have access to the Site. In addition, the Tower may promote public health and safety by increasing access to E911 services in areas around the Site with existing gaps in coverage.

M. Will the application complies with any applicable specific requirements set forth in this chapter for special land use permits for particular types of uses?

The Application complies with Section 7.19 of the Ordinance, which is the provision of the Ordinance relating to the issuance of special land use permits for antennas and towers over 35 feet in height.

N. Has the applicant has provided sufficient information to allow a full consideration of all relevant factors?

Applicant believes it has provided sufficient information to allow the Mayor and City Council to fully consider the request to issue a special land use permit for the Tower. Applicant remains available to answer any questions that the Mayor and City Council may have relating to the Application or the proposed use.
